CONTENTS OF VOLUME XXX.

NUMBER LXXXVIII.

Page.

ART. I. On the Origin of Species; by Prof. THEOPHILUS PARSONS, 1

II. Notes on the Habits of the Common Cane, (Arundinaria macrosperma, *Michx.*); by HUGH M. NEISLER, - - - 14

III. Experiments on the forms of Elongated Projectiles; by Prof. OGDEN N. ROOD, - - - - - - - - - 17

IV. On the Conservation of Force, by Prof. JOSEPH HENRY, - 32

V. On a mode of employing Instantaneous Photography as a means for the Accurate Determination of the Path and Velocity of a Shooting Star, with a view to the Determination of its Orbit; by JONATHAN H. LANE, - - - - - 42

VI. The true figure of the Earth.—(Mädler's Review of Schubert's Essay on the Figure of the Earth), - - - 46

VII. On the Transit Instrument as a substitute for the Zenith Telescope in determining Latitude, and on the Latitude of New Haven; by Prof. C. S. LYMAN, - - - - - 52

VIII. On Fixing Magnetic Phantoms; by Prof. J. NICKLÈS, - 62

IX. On some Questions concerning the Coal Formations of North America; by LEO LESQUEREUX, - - - - - - 63

X. On an Oil-Coal found near Pictou, Nova Scotia; and the Comparative Composition of the Minerals often included in the term Coals; by Prof. HENRY HOW, - - - - 74

XI. The Great Auroral Exhibition of Aug. 28th to Sept. 4th, 1859; and the Geographical Distribution of Auroras and Thunder storms.—Fifth Article. With a plate. By Prof. ELIAS LOOMIS, - - - - - - - - - - 79

XII. On the Products of the Distillation of Common Rosin; by JAMES SCHIEL, - - - - - - - - - - 100

Page.

XIII. Fall of Meteoric Stones.—(1) An account of the fall of Meteoric Stones at New Concord, Ohio, May 1st, 1860; by Prof. E. B. ANDREWS. (2.) Computations respecting the Meteor; by Prof. E. W. EVANS. With further notices of the same, by D. W. JOHNSON, Esq. and Dr. J. LAWRENCE SMITH, - - - - - - - - - - - 103

XIV. Review of Dr. Antisell's Work on Photogenic Oils, &c., 112

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On Chlorophyll, 121.—On the separation and estimation of Phosphoric Acid, 122.—On a new mode of preparing Calcium: On a new Metallic Element, 123.—Notes on the extent to which Mercury volatilizes along with the vapor of water at 100° C., by J. W. MALLET, 124.

Technical Chemistry.—Disinfectants, coal tar and gypsum, 125.—Chlorate of potash: Whites of eggs, 127.—Powdered sugar: Cherry-laurel water, glycerine and cellulose: Coke of Boghead coal, 128.—Mixed plaster and charcoal: Carbonic acid: Bituminous water of Visos: Tincture of iodine: Perchlorid of iron: Nitrate of lead: Creosote, 129.—Chlorinated sponge: Subnitrate of bismuth, 130.—Decoloration of Indigo by sesquioxyd of iron, 132.

Geology.—On some points in Chemical Geology, by T. STERRY HUNT, F.R.S., 133.

Botany and Zoology.—Flora of the Southern United States, etc., by A. W. CHAPMAN, M.D., 137.—Synopsis of Dalbergieæ, a Tribe of Leguminosæ, by GEORGE BENTHAM, Esq.: Reports on the Natural History, etc. of Minnesota, Nebraska, Washington, and Oregon Territories, made in connection with the Survey of a Pacific Railroad Route, under the command of Gov. I. I. STEVENS, by G. SUCKLEY, M.D., and J. G. COOPER, M.D., 138.—Potamogeton crispus, L., 139.—Marsilea quadrifolia, L.: Catalogue of the Acanthopterygian Fishes in the collection of the British Museum, by Dr. A. GUNTHER, 140.

Astronomy.—First Comet of 1860: Second Comet of 1860: On the alleged intra-Mercurial Planet, 141.

Book Notices.—Prof. AGASSIZ on the Origin of Species, 142—Anleitung zur Organischen und Gasanalyse von J. SCHIEL, 155.

Miscellaneous Scientific Intelligence.—Parhelia seen at Weld, Franklin Co., Me., by STILLMAN MASTERMAN, 155.—Tolles' improved Microscope Objectives: Application of Photography in construction of Micrometers, 156.—Geological Survey of California: Total Eclipse of July 18, 1860: Newport Meeting of the American Association for the Advancement of Science.—Letter from JOHN MCCRADY, Esq., on the Lingula pyramidata, 157.—The Fusion and Casting of Platinum, 158.—New Arctic Expedition, by Dr. I. I. HAYES: Constitution, etc. of the Chicago Academy of Sciences, 159.—*Personal.*—Prof. A. D. Bache: Prof. Dana: Prof. Benjamin Pierce: Prof. J. P. Cooke: The gold medals of the Lond. Geog. Society: Lady Franklin, 159.—To Correspondents, 160.—*Obituary.*—Rev. Baden Powell: Charles Goodyear, 160.

Proceedings of Societies, 160.

NUMBER LXXXIX.

Page.

ART. XV. On the Nebular Hypothesis; by Professor DANIEL KIRKWOOD, - - - - - - - - - - - 161

XVI. On a new Theory of Light, proposed by John Smith, M.A.; by Prof. OGDEN N. ROOD, - - - - - - - - 182

XVII. On the Meteor of November 15th, 1859; by Prof. H. A. NEWTON, - - - - - - - - - - - 186

XVIII. Crystalline form not necessarily an indication of definite Chemical Composition: or, on the possible variation of constitution in a mineral species independent of the Phenomena of Isomorphism; by Prof. JOSIAH P. COOKE, Jr., - - 194

XIX. Notices of several American Meteorites; by CHARLES UPHAM SHEPARD, - - - - - - - - - - 204

XX. Arsenic Eating: Influence of Arsenious Acid upon the Waste of the Animal Tissue, - - - - - - - 209

XXI. Geographical Notices. No. XIII, - - - - - - 217
Journal of the American Geographical Society: Schlagintweit's Mission to Central and High Asia, 217.—Canadian Expedition to the Red River under Gladman, Dawson, Hind, and Napier, 1857–1858, 218.

XXII. Discussion between two Readers of Darwin's Treatise on the Origin of Species, upon its Natural Theology, - - 226

XXIII. Description of three New Meteoric Irons, from Nelson County, Ky., Marshall County, Ky., and Madison County, North Carolina; by Prof. J. LAWRENCE SMITH, M.D., - 240

XXIV. Description of a new Trilobite from the Potsdam Sandstone; by FRANK H. BRADLEY, with a note by E. BILLINGS, 241

XXV. On the Combustion of Wet Fuel, in the Furnace of Moses Thompson; by Prof. B. SILLIMAN, Jr., - - - - - 243

XXVI. Note on a case of Artificial Crystallization of Metallic Copper and Di-oxyd of Copper; by Prof. J. W. MALLET, - 253

XXVII. Review of Dr. Antisell's Work on Photogenic Oils, &c., 254

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On a probable means of rendering visible the Circulation in the eye; by Prof. OGDEN N. ROOD, 264.

Technical Chemistry.—Care of Platinum Crucibles, by ERDMANN, 265.—Safe and easy method of rectifying Sulphuric Acid, by N. NEESE, 267.—Vulcanization of Caoutchouc, by means of mixed Sulphur and Hypochlorite of Lime, by G.-DE CLAUBRY: Preparation of Cyanid of Barium and of Ammonium with the Nitrogen of the Air, by MARGUERITTE and DE SOURDEVAL: Gun-Cotton Filters, by Prof. BOETTGER, 268.—Preservation of Flesh, by VERDEIL, 269.—Magnesium as a source of Light, by A. SCHMITT, 270.—Method of employing carbonic acid in connection with the hypochlorite of lime used for bleaching paper-stock, by DIDOT and BARRUEL: New fusible metal, by Dr. B. WOOD, 271.

Geology.—Note from Dr. NEWBERRY, in reply to Mr. LESQUEREUX, 273.

Botany and Zoology.—Geological and Natural History Survey of North Carolina. Part III. Botany, etc., by Rev. M. A. CURTIS, 275.—Thwaites, Enumeratio Plantarum Zeylanicæ: Walpers, Annales Botanices Systematicæ, by Dr. C. MÜLLER: Bueck, Index ad De Cand. Prodromum, etc.: Synopsis Methodica Lichenum omnium hucusque cognitorum, præmissa introductione lingua Gallica tractata, scripsit WILLIAM NYLANDER, 276.—Reports of Explorations and Surveys for a Railroad from the Mississippi River to the Pacific Ocean, (FISHES), by CHARLES GIRARD, 277.

Astronomy and Meteorology.—Solar Eclipse of July 18, 1860: Notice of the Astronomical Expedition to Cape Chudleigh (or Chidley), Labrador, 281.—Extract of a letter from the Superintendent of the Coast Survey to the Editors in relation to observations made on the Western coast of the United States, by Lieut. J. M. GILLISS, U. S. N., 285.—Observations made during the Total Eclipse of 18th July, 1860, on the summit of Mount Saint-Michel, in the desert of Palmas, Spain, by A. SECCHI, S. J., 288.—On the polarization of the light of the corona, and of the red protuberances, in total solar eclipses, Bailey's Beads, LEEPIAULT: Third Comet of 1860, 292.—The meteor of July 20th, 1860, 293.—The Meteors of August 2d and 6th, 1860, by Prof. C. S. LYMAN, 295.—Further Notice of the New Concord (Ohio) Meteor, of May 1, 1860, by Professor E. W. EVANS: Shooting Stars of August 9–10, 1860, 296.

Miscellaneous Scientific Intelligence.—Fourteenth Meeting of the American Association for the Advancement of Science, 292.—List of papers presented to the Association, 299.—Reclamation by Gov. STEVENS of Washington Territory, 302.—Dr. Suckley's Disclaimer: Stereoscopic Advertisements (with illustration), by E. W. BLAKE, Jr.: Paraselena and Lunar Rainbow, by Lieut. J. M. GILLISS, 304.—Oil Wells of Pennsylvania and Ohio, 305.—Artesian Well at Columbus, Ohio, by T. E. WORMLEY, Esq.: Salt Wells in Michigan, 206.

Book Notices.—A Treatise on Elementary and Higher Algebra, by Prof. THEODORE STRONG, LL.D., 306.—Contributions to the Palæontology of Iowa, by JAMES HALL, 307.

Personal.—Prof. Dana: Prof. C. U. Shepard: Prof. Elias Loomis, LL.D.: Joseph E. Sheffield, Esq, 308.

Proceedings of Societies, 308.

POSTSCRIPT.

LeVerrier's Report on the Solar Eclipse of July 18, 1860, at Tarazona in Spain, 309.

NUMBER XC.

Page.

ART. XXVIII. Lecture on the Gulf Stream, Prepared at the Request of the American Association for the Advancement of Science; by A. D. BACHE, Supt. U. S. Coast Survey, - 313

XXIX. On Fermented and Aërated Bread, and their Comparative Dietetic Value; by J. DAUGLISH, M.D., - - - 329

XXX. Additional Note on the Potsdam Fossils; by E. BILLINGS, 337

XXXI. The Great Auroral Exhibition of Aug. 28th to Sept. 4th, 1859.—6th Article; by Prof. ELIAS LOOMIS, - - - 339

XXXII. On the direction of molecular motions in Plane Polarized Light; by Prof. W. H. C. BARTLETT, - - - - - 361

XXXIII. On some Questions concerning the Coal Formations of North America; by LEO LESQUEREUX, - - - - - 367

XXXIV. Additional observations on the Circulation of the Eye; by Prof. OGDEN N. ROOD, - - - - - - - - 385

XXXV. Some experiments and inferences in regard to Binocular Vision; by Prof. WILLIAM B. ROGERS, - - - - - 387

XXXVI. Geographical Notices. No. XIV, - - - - - 391

Prof. Guyot's Measurements of the Alleghany System, 391.—New Map of the Alleghany System, by Mr. E. Sandoz, 392.—Narrative of a Voyage to Spitzbergen, in the year 1613, 393.—Dr. Engelmann's Measurement of the Elevation of St. Louis above the Gulf of Mexico, 394.—Kiepert's Neuer Hand Atlas, 396.—Exploration of Western British America, 397: 1. Report from the Select Committee on the Hudson's Bay Company. House of Commons, 1857.—2. Papers relating to the Affairs of British Columbia. London, 1859.—3. Northwest Territory. Reports of Progress. By HENRY YOULE HIND, M.A., in charge of the Expedition. Toronto, 1859.—4. Report on the exploration of the Country between Lake Superior and Red River Settlement. By S. J. DAWSON, Esq., C.E. Toronto, 1859.—5. Geological Survey of Canada. Report of Progress for the year 1858. Montreal, 1859.—6. Map of the Northwest part of Canada, Indian Territories and Hudson's Bay; compiled and drawn by THOS. DIVINE. Toronto, 1857.—7. Government Map of Can-

ada from Red River to the Gulf of St. Lawrence, compiled by THOMAS DEVINE. November, 1859.—Dr. Barth in Asia Minor, 398.

XXXVII. Further Remarks on Numerical Relations between Equivalents; by M. CAREY LEA, - - - - - - 399

XXXVIII. On the Production of Ethylamine by Reactions of the Oxy-Ethers; by M. CAREY LEA, - - - - - - 401

XXXIX. On the Optical Properties of the Picrate of Manganese; by M. CAREY LEA, - - - - - - - - - 402

XL. On our inability from the Retinal impression alone to determine which Retina is impressed; by Prof. WILLIAM B. ROGERS, - - - - - - - - - - - 404

XLI. Correspondence of J. NICKLÈS, of Nancy, France.—Physical Chemistry.—Polarized light employed as a reagent, BIOT, 409.—On the existence of new simple bodies, BUNSEN and KIRCHHOFF, 410.—Catalysis and Contact Actions, LOEWELL: His researches on supersaturated saline solutions, 411.—Empiricism—Application of the Physical Sciences to Medicine, 412.—Electro-Magnets and Magnetic Adhesion, 413.

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Chemical Analysis by Observations of Spectra, 415.—Sodium, 416.—Lithium: Potassium, 417.—Strontium: Calcium, 418.—Barium, 419.—On some numerical relations between the densities and equivalents of certain elements: On the Loss of Light, by Glass Shades, by WM. KING and Prof. VERVER—with a note of additional experiments, by FRANK H. STORER, 420.—Note on the last, by B. SILLIMAN, JR., 423.

Astronomy.—New Planets, the 59th, (FERGUSON): the 58th, *Concordia* (LUTHUR), 424.

Personal.—Prof. J. D. Whitney; Prof. Wm. H. Brewer; Mr. William Ashburner, 424; sailed for California in charge of the Geological Survey of that State.

General Index of Vols. XXI—XXX, Second Series, 424, 425.

Obituary.—Dr. W. P. Holmes, 424.

For a list of the Plates and Errata in Vols. XXI—XXX, see end of Index.

ERRATA.

P. 162, l. 16 from bottom, for "many" *read* "some."
" 167, l. 23 from top, for "best," *read* "test."
" 174, l. 18 from top, for "point," *read* "part."
